

Aircraft Rescue and Firefighting Stations 19 and 29

Sky Harbor International Airport, Phoenix, Arizona

As subconsultant, Dibble provided the civil engineering for two ARFF stations:

Station No. 19 - A 7-bay fire station on a 4.5-acre site with a 50-space parking lot located southeast of Terminal 3. Work included grading; drainage; AC and PCCP paving; sewerline, storm drain, fireline and waterline design; coordination with adjacent taxiway clearances; airside security fencing; and relocation of an existing airfield access/security gate and airfield service road.

Station No. 29 - A 6-bay fire station on a 3-acre site with a 30-space parking lot. Work consisted of grading; drainage; AC and PCCP paving; sewerline, storm drain, fireline and waterline design; taxiway shoulder pavement; coordination with adjacent taxiway clearances; and airside security fencing.

Station No. 19

Station No. 29
