

Maricopa County Sheriff's Office Blue Point Substation and Boater Safety Facility

Maricopa County, Arizona

Dibble provided civil engineering and survey services for the Blue Point Sheriff's Substation and Boater Safety facility on Bush Highway and Utery Pass Road near Saguaro Lake. This Construction Manager at Risk project included deputy and administrative areas, holding cells, nurse and first aid stations, classroom space, and staff and public restroom facilities. Dibble's scope of work for the 5-acre site included topographical survey and site design, which involved access drives, a helicopter landing pad, and parking facilities for employee, visitors, and boat trailers. Additional elements included installation of a new well and water system, a new sewer system and septic tank, and drainage and retention improvements that required routing several washes through the site.
